

Quick Change Delineator

RAPID CONVERSION DELINEATION

The KonaPost® is an excellent alternative to traditional orange cones. It is ideal for reoccurring applications where orange cones or markers are often impacted and must be quickly deployed in specific patterns on a regular basis.

The unique design of the KonaPost® enables it to take multiple impacts and stay in place. It has been tested to take over 200 direct wheel impacts at 72 kmh. The flexible 152mm plug easily inserts into a hot-dip galvanised steel receptacle that is recessed into the pavement. The posts can be deployed when needed and quickly removed by lifting them out of the pavement receptacles.

Applications

The heavy duty KonaPost® can be used as a channelising, marking, delineation device in many applications, including:

- Gate closures
- Reversible lanes
- Lane redirect
- Parking lots
- Garage environments
- Event management

Post Height	483mm
Post Width	102mm
Plug Height	152mm
Receptacle Plate Width	114mm
Receptacle Depth	203mm

Features & Benefits

- Extremely impact resistant.
- 360° full visibility.
- No protruding metal parts.
- One piece post construction.
- Withstands extreme temperatures.
- Easy placement.
- Reflective sheeting available.
- Available in white, yellow and orange (custom colors available).
