STRUCTURES

ALUMINUM FINISHES

As one of the largest custom finishers in the United States, Valmont is capable of producing a wide range of exterior finishes to resist corrosion and extend the life of any structure.

Valmont provides anodizing, an electrochemical finishing process with an eye-catching final result.

Valmont Structures also offers an assortment of pole finish colors to meet your design specifications. Our durable and attractive colors are chemical, corrosion and abrasion resistant in the appropriate surroundings and when combined with suitable surface preparation techniques. As industry experts, we make finish recommendations based on your environment and performance expectations, along with many other variables. It is our knowledgeable personnel and factual data and analysis that set us apart from the competition.

Enhance your pole's aesthetic appeal by selecting one of our bold colors for emphasis or a subtle color to blend into the environment. Or if a custom color is what you're looking for, please contact our factory for more information.

NATURAL
