

Maximize Your Farm's Efficiency and Sustainability

Valley, Ag Solar solutions bring clean, dependable energy to your agribusiness, helping you gain energy independence and long-term savings. Backed by decades of ag expertise and hundreds of solar projects, we deliver custom systems designed for your unique needs. Whether you're powering remote locations, offsetting high energy use, or improving sustainability, Valley makes the transition to solar simple with support from design and permitting to financing and installation.

Renewable energy offerings:

- Ground Mount Racking Fixed tilt galvanized steel structure available and adjustable to 20, 25, 30, and 35 degree angles
- **Inverters** Single phase applications starting at 8KW and 3 phase applications starating at 25KW
- Solar Panels Tier 1 Biafacila solar panels currently at 540W per panel
- Solar Kits Completed solar kits including racking, inverters, panels and DC components are available in the 25, 50, and 60KW kits
- Stamped Engineering Plans Engineered plan sets available for all projects. Engineered plan sets are not only used to help install system but are also needed for interconnection with your local Utility provider. All plan sets are verified by dealer before product is ordered.

Ag Solar

Valley offers the most durable irrigation structures in the field, as well as the most advanced solar service solutions, providing sustainable power by efficiently converting the sun's rays to clean energy.

- Distributed generation of photovoltaic, or PV energy (converting light into electricity).
- Engineered design and approval of detailed technical projects.
- Consulting on new PV installation focusing on agri-business.
- Every solar installation includes remote monitoring capabilities.

Energy Compensation System
