Conserving resources.  
Improving life.

# Durable. Sustainable. Resilient.

Light poles take a pounding from people, traffic, debris, chemicals, severe weather and other harsh environmental conditions – leaving them susceptible to rust, rot and corrosion, even vandalism and theft. That can dramatically impact the aesthetics of roadways, streets and walkways, while increasing the costs of maintenance.

Enduro™ decorative base covers from Valmont Structures are designed and engineered to perform, even under the worst conditions, to deliver durability, sustainability and resilience, year-after-year, season-after-season. So, you're assured lighting that looks as good as it lasts.

Washington

**VIRTUALLY INDESTRUCTIBLE,  
THESE DECORATIVE BASE  
COVERS ARE PRACTICALLY  
MAINTENANCE-FREE TO  
ENSURE THE LOWEST TOTAL  
COST OF OWNERSHIP.**

## Appearance is everything

Whether you need to match the style and architecture of a particular area or create a new aesthetic, our Enduro line of decorative bases allows you to achieve your vision, with:

- 12 distinct styles, with multiple sizes to scale from lighting to traffic.
- Clam shell design for fast and easy installation.
- Styles with cast-in reducer rings to minimize urban clutter and optimize scale to specific pole sizes.
- Black pigment throughout, with exterior topcoat available in a variety of colors to minimize appearance of paint scratches.
- Non-conductive without conventional access door to improve safety and security.

**BUILT TO LAST, VALMONT'S ENDURO  
DECORATIVE BASES OFFER A 3-YEAR  
LIMITED WARRANTY.**

## Engineered for excellence

With decades of experience and expertise, Valmont engineers seamlessly pair Enduro decorative bases with lighting structures to meet your specifications. And we're able to:

- Support a variety of materials including steel and aluminum poles.
- Meet DOT requirements, as well as lighting specifications and standards for all U.S. states and Canadian provinces.

## Enduro prevents what other materials can't

Enduro molded decorative bases and topcoat eliminates the risk associated with environmentally driven damage and impacts – unlike cast iron, aluminum, fiberglass and other materials.

### Oxidation

Gravel, deicing and even landscape equipment compromise paint, exposing metal castings to oxidation, lack of adhesion and brittleness – but not Enduro.

### Maintenance

Cast iron and other materials can require constant maintenance to fight the elements – but Enduro is not susceptible to these breaches.

### Impact

Vehicles and equipment can cause impacts that result in severe damage – but Enduro is impact-resistant to damage.

### Failure

Sustained impacts over time can cause fiberglass to fail, leaving detailing missing – but Enduro retains product integrity down to the smallest detail.

### Safety and Theft

Whether due to vandalism or theft, missing aluminum clamshells and access doors compromise safety and security. But, with no resale value or access doors, Enduro decorative bases eliminate the risk.

Brookhaven

## Proprietary material stands up to extremes

Enduro decorative base covers by Valmont Structures are molded of a proprietary elastomeric urethane formulation and further protected with a UV and weather-resistant catalyzed liquid acrylic polyurethane top coating. So, they're ideal for any environment and any extreme:

### Cold Weather

Shatter-resistant in cold temperatures

### Hot Weather

Tested to 200° F without distortion

### Coastal Climate

Well-suited to salt spray

### Harsh Weather

Stands up to snow and ice, as well as salt and deicers
