COATINGS

We see you. We hear you. We know what you need.

Best service. Best capacity. Best price. Best promise.

VALMONT COATINGS

As a full-service coatings company, Valmont Coatings provides quality surface finishes that extend the service life and improve the appearance of metal products throughout the country. In fact, Valmont Coatings is one of the largest custom galvanizers in North America. Our processes and transportation capacities are designed to efficiently handle steel products of all shapes and sizes, for customers anywhere in the country. Through continuous innovation, Valmont Coatings has also developed quality processes for powder coatings, anodizing and imbedded graphics.

SEAMLESS SERVICE

The depth and breadth of our coatings services makes Valmont Coatings a one-stop shop for all of your galvanizing and coatings needs. From the largest steel structures to the smallest parts, our galvanizing facilities provide end-to-end service.

Further, our strategically located galvanizing plants build off of each other's strengths to provide the right solution for every project, at the best price. So, you can depend on Valmont Coatings to deliver a high quality finished product, on time, through service that is meticulous and seamless.

IMPECCABLE QUALITY

At Valmont Coatings, our material handling personnel and galvanizing technicians are expertly trained in the most efficient galvanizing processes. Every Valmont Coatings plant is held to the highest standards for quality control to ensure the finished product we deliver is of the highest quality.

HIGH VALUE

Because Valmont Coatings is able to leverage strengths between our various plant locations, you are assured of receiving not only the best competitive price for your projects, but also the highest value for the money spent. Our plants work together to maximize efficiencies, taking into account such factors as location, kettle sizes and shipping and delivery requirements. This collaborative process allows us to provide optimum solutions that meet or exceed your customers' project objectives.

VAST CAPACITY

The combined capabilities of our state-of-the-art plants provide Valmont Coatings with the capacity to galvanize projects of any size, quickly and efficiently.

QUICK TURNAROUND

Valmont Coatings provides quick turnaround and on-time deliveries for every project. Because of our quick response times, Valmont Coatings takes up less of a project's overall timeline, thus allowing fabricators more leeway in their production schedules.

OUR PROMISE

At Valmont Coatings, we promise to serve our customers with superior service, impeccable quality and on-time delivery at the best value.

Galvanized to exceed your expectations.

THE LEADING GALVANIZER

Valmont Coatings is the market and technical leader in hot dip galvanizing. We are one of the largest custom galvanizers in North America, serving all steel fabrication markets from coast to coast. Valmont Coatings is a member of the American Galvanizers Association.

SIZE MATTERS

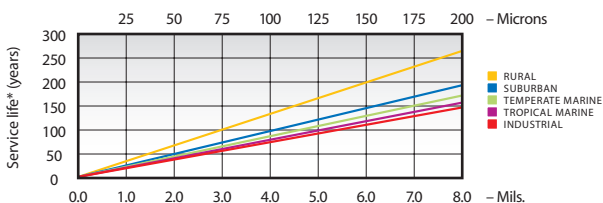

With kettles ranging from 60' long to 10' deep, there are few products Valmont Coatings cannot accommodate. We have the capacity to galvanize products of all shapes and sizes, from one single multi-ton item, to thousands of small parts.

THE ADVANTAGES OF GALVANIZING

Galvanizing, in the right environment, provides the longest lasting, lowest maintenance, highest value coating available. Not only does galvanizing provide superior corrosion protection through a metallurgically bonded finish, maintenance costs are reduced and environmental impact over the life of the product is significantly lower.

Service Life for Hot-Dip Galvanized Coatings

Derived from The Zinc Coating Life Predictor

Average thickness of Zinc

*Service life is defined as the time to 5% rusting of the steel surface.

Note: 1 oz./ft. ~ 1.8 mils

Further, the closed-loop galvanizing system is contained and allows for the recycling of waste materials, making the process more efficient and environmentally sound.

POWDER COATING

Valmont Coatings' powder coating, a completely dry finishing process, is another high performance alternative to paint systems. Steel of all shapes and sizes can be powder coated in a variety of textures and colors for a durable, high quality finish.

ANODIZING

Valmont Coatings' anodized finishes provide considerable advantages for surfaces of both small and medium-sized aluminum parts. The electro-chemical process is capable of producing a wide range of surface finishes, from bright to dull matte, in a variety of colors. Anodizing also enhances resistance to abrasion and corrosion, and reduces surface electrical conductivity.

E-COAT SYSTEMS AND EMBEDDED GRAPHICS

Valmont Coatings is a premier provider of decorative metal finishes and electro-deposit painting (E-Coat). Our unique finishes add value and expand market appeal to products for daily life.
