CYCLEWAY BARRIERS

About Webforge

The Webforge Monowills name is synonymous with quality and performance.

With an unmatched record and reputation, Monowills fences and railings are in service Australia wide in a vast range of industries. From retail and civic spaces through to heavy industry and mining, Monowills outperforms.

Funnel design safely guides riders in and out of Velocity Barriers

Webforge renowned high quality welded barriers are as attractive as they are functional

Offset 'rub rail' and smooth welded construction is standards complaint and prevents catches and pedal strikes.

AUSTROADS: BICYCLES 7.6.2 Cycle Barrier Fence

A key objective of fences constructed in close proximity to bicycle lane or path facilities, cyclists (and their bicycles) should be able to brush against fences at speed and not be injured or 'caught' as a result.

Standardised designs, or fully bespoke systems available to suit any location or budget.

Materials and finishes:

- Mild Steel
- Stainless Steel
- Galvanised
- Painted
- Powder Coated
- Electro Polished

In-ground and bolt-down mounting options available
